AV Processor

A Denon 500AV Processor is provided for source selection and volume control. The AV processor receives up to 6 HDMI feeds from the content sources at native 1080P and provides surround decoding and speaker setup parameter adjustment. Refer to the Denon DN 500AV user manual for additional information.

SS-19 Screen Scaler / Sender

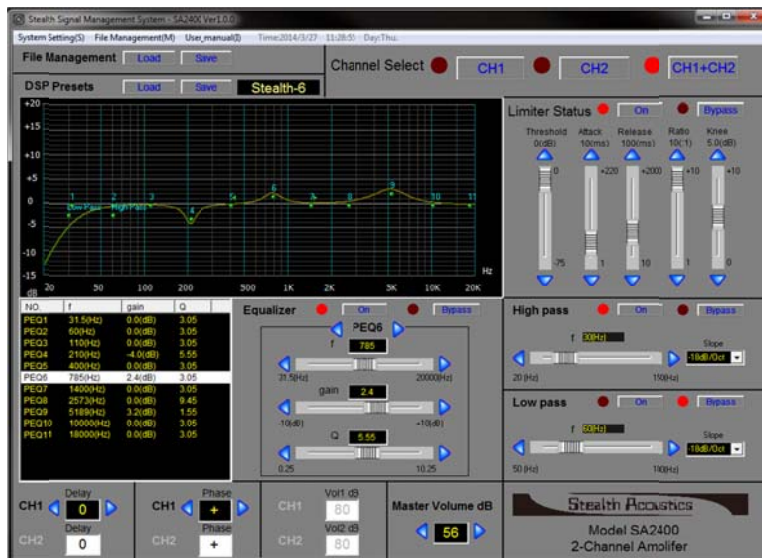

The SS-19 Screen Scaler / Sender Accepts HDMI at 1080P from the AV Processor and converts the signal to CAT5/6 cabling to screen. The SS-19 is set for proper operation at the factory and has no user functions.

SA2400 Power Amplifiers with DSP

The SA2400 power amplifier offers a minimum of 310W audio power into each of the Patio Theater's built in LRG series invisible speakers. The B30G subwoofers receive 450W from the amplifier. The compliment of amplifiers in the system supports the selected audio speaker package (2.1, 5.1, 7.1 etc.).

SA2400 DSP Software

The SA2400's comes pre-optimized from the factory set to power the specific SPT speaker compliment. Utilizing Stealth's free SSMS software, the field installer can further adjust the SPT speaker tuning for best results.
